HOW EVERY PROJECT RUNS

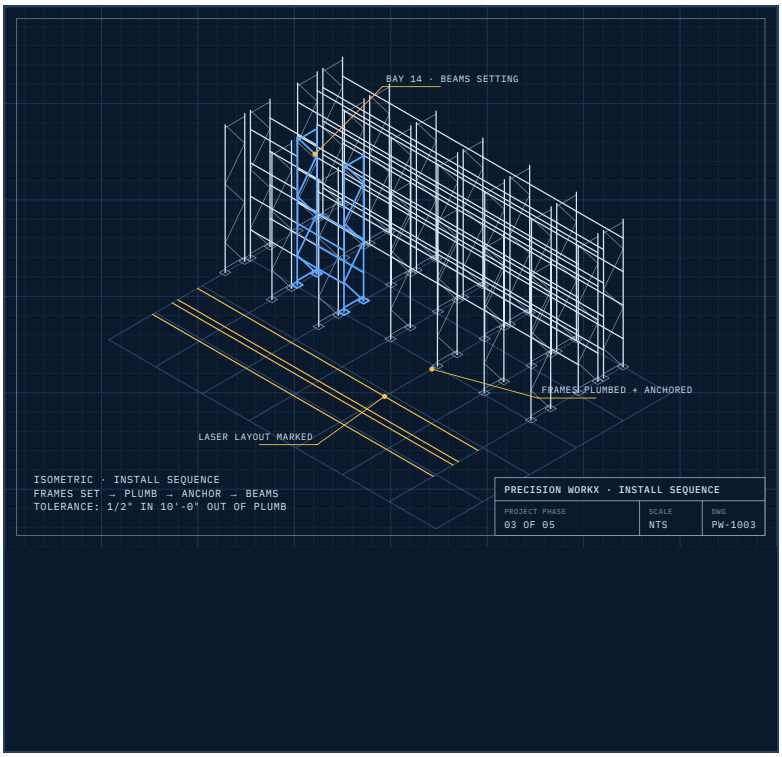

01
Initiation
We review your request for quote, clarify scope and deliver a clear price.

02
Preparation
Once your purchase order is in, we plan crews, equipment, materials and schedule.

03
Execution
Our team builds on site, with safety and quality checks built into each day.

04
Controlling
We track progress, budget and changes and keep you updated throughout.

05
Closure
Final walk-through, punch list and handover of a finished, documented system.

SAFETY PROGRAM

- Site walk and hazard review before mobilization
- Daily safety huddle, PPE, lift and harness checks
- Barricaded work zones around live operations
- Stop-work authority for every crew member
- Anchors, beam locks and connections inspected before handover
- EMR / TRIR: 0.82 / 1.10 TBC

QUALIFICATIONS

- **ISNetworld** Contractor prequalification TBC
- **Avetta** Supplier prequalification TBC
- **MHEDA** Association member TBC
- **OSHA 30** Trained field supervisors TBC
- **Insured** General liability + workers comp TBC

NATIONWIDE COVERAGE

Crews are recruited mainly in the Carolinas and travel with their own tools and lifts. Short-term and project-length staffing available for dealers and integrators.

WHY PRECISION WORKX

- One team from site survey to as-built
- Field installation company, not a rack manufacturer
- In-house fabrication for off-standard parts
- Single point of contact on every job
